Erbil, Iraq | +964 751 540 3341 | abdullahsardaraziz@gmail.com | linkedin.com/in/abdullahsardaraziz

SKILLS

- **Program and Operations:** Commercial proposal and offer development, scope and contract drafting, SOP and template systems, trainer sourcing and selection, programme scheduling, quality assurance.
- **Technical:** Python (OCR, web scraping), data cleaning and analysis (Excel, linear regression), IT support, network diagnostics.
- **Business Development:** B2B client engagement, market gap analysis, quotations, stakeholder communication.
- **Tools:** Directus CMS, Adobe InDesign, Canva, Microsoft Office (advanced Excel), Google Workspace.

PROFESSIONAL EXPERIENCE

Mesopotamia Leadership Institute (MLI), Erbil, Iraq

Program Assistant Intern *Jun 2026 - Present*

Programmes appear below as initials. Several are unannounced at the time of writing, so each is described through my contribution to it rather than its content.

SLP | Executive leadership programme, corporate client

- Rebuilt the business proposal and the commercial offer that went to the client's senior leadership, covering the full module pathway, facilitator profiles, and costing.
- Wrote the Scope of Work for the Master Trainer and Learning Methodology Consultant role, then drafted the service agreement behind it: deliverables, payment milestones, confidentiality, and termination.
- Built the technical interview pack the panel used to select that consultant, including the question set, evidence checklists, and a weighted competency scorecard.
- Collected and normalised competing facilitator quotations so the team could compare like for like instead of guessing.

XP | Multi-site institutional training rollout

- Restructured the project proposal, adding visual KPI, payment schedule, and cost breakdowns so targets and figures could be read at a glance.
- Prepared the Bill of Quantities and built the implementation timeline as a formula-driven Excel Gantt chart across ten workstreams and eighteen months, so the schedule redraws itself when the plan changes.
- Produced the site-readiness quality assurance checklist covering seven assessment areas, and contributed to the digital literacy component through planning discussions and curriculum development.
- Evaluated and ranked the candidate shortlist against defined criteria, and tracked the order through the procurement workflow.

SA | Youth skills programme, foundation client

- Built the trainer fee and availability form, ran the outreach and follow-up with candidate trainers, and maintained the quotation master and live tracker behind the selection.
- Drafted the commercial proposal issued to the client.

KCP | International digital skills partnership

- Redesigned the partnership pitch deck end to end, converting dense bullet content into structured tiles and figures, and rebuilding the partner logo lockups so all three partners sat on one baseline.

Institute-wide

- Designed the standing document system the Programs department now works from: 12+ SOPs, templates, and controlled forms, including the intern weekly reporting form, the digital access control SOP, the training quality assurance checklist, the project charter, the trainer profile, and a formula-driven invoice template.
- Maintained MLI's AACSB accreditation record, rebuilt the business profile into a format the team can actually update, and compiled the institute's entity submission for the parent holding group's website, covering descriptive copy, project bios, white-format logo assets, and channel links.
- Researched a zero-budget route to building MLI's online community across WhatsApp, Instagram, LinkedIn, Facebook, and Telegram, delivered as a structured report with a recommended launch path.
- Standardised file naming across the shared drive, kept trainer and participant records accurate, and represented MLI at a regional business forum.

Department of Information Technology (DIT), KRG, Erbil, Iraq

Student Intern *Jan 2026 - Feb 2026*

- Rotated through 8 specialised teams: Business Intelligence, Software Development, Infrastructure (NOC and SOC), Technical Support, QA and Testing, Media, AI, and Public Relations. Came out with a working picture of how public-sector digital transformation actually happens in the KRG rather than how it looks on paper.

Foresight Inc., Remote

Business Development Associate, B2B *Jun 2025 - Nov 2025*

- Identified and engaged prospective B2B clients across Iraq and the Levant in the construction, hospitality, education, and F&B sectors, including Lexus, Erbil Avenue, Azberry, Fried Chicken, and etc.
- Analysed where smart infrastructure needs were going unmet, matched the right solution to each client, prepared the tailored quotations that moved deals forward, and supported the distribution team in connecting with system integrators across the region.

KRG Council of Ministers Advisory Office / Institut für Kurdische Studien e.V., Erbil, Iraq

Digital Content and Data Specialist *Mar 2025 - Mar 2026*

- Digitised a 13-book multilingual series by Dr. Feryad Fazil Omar into a Directus backend to power KurdLingua, a mobile app for Kurdish children living outside the region. Each book carries 3,500+ words and phrases across Kurdish Sorani, Kurdish Latin, and one of thirteen second languages.
- Cleaned large text exports from Adobe InDesign into structured content, and synchronised recorded audio with the Kurdish text at word level, so a learner can follow each word as it is read aloud. Slow, exacting work, and the part of the app people feel most.

AI and Innovation Center (AIIC), UKH, Erbil, Iraq

Data Engineer Intern *Feb 2025 - Mar 2025*

- Built and tested Python OCR pipelines for Kurdish Sorani, a script most off-the-shelf tools mangle, and hardened them until the text came out intact instead of corrupted.
- Wrote Python web scrapers to aggregate structured regional data and applied linear regression to surface the patterns the research team was looking for.

LionsFort Company, Erbil, Iraq

IT Officer (Part-Time) *Jul 2024 - Mar 2025*

- Diagnosed malfunctioning networking devices and ran QA testing on Ruijie and EnGenius products, keeping day-to-day operations from stalling.
- Drafted the company website launch plan, contributed to business proposals for brand partnerships, and produced social media content with Canva and Adobe Express.
- Designed training presentations for partner-company professionals, and ran on-site logistics and support for company events and certification exams.

EDUCATION

University of Kurdistan Hewler (UKH), Erbil, Iraq

BSc in Computer Engineering *2022 - 2026 (Final Year)*

- Elected Department Representative, Computer Engineering: chosen by peers to carry their concerns to faculty.

CERTIFICATIONS AND AWARDS

- **Technical:** Ruijie Specialist Engineer (Ruijie Networks); EnGenius Certified Network Specialist (EnGenius).
- **Professional Development:** Design Thinking Bootcamp (GIZ, The Station, Korek Telecom); Youth Incubator and Youth Ignite Entrepreneurship (51Labs); Youth Employment Program (Wedo); Life Skills and Leadership (GIZ); AI Masterclass (Vision Education).
- **Awards:** Volunteer of the Year (UKH and SSWC).
- **Volunteering:** Logistics team and point of contact between teams and organisers, International Scientific Conference on AI (Vision Education); AutoShow 2024 (Erbil International Fair).
